BWF EQUIPMENT CERTIFICATION PROGRAMME

SHUTTLECOCK

INTRODUCTION

This scheme was introduced in 1988 and focuses on whether equipment complies with:

- The relevant Laws of Badminton;
- Whether there are any likely safety hazards caused by the design and technical properties.

CERTIFICATION PERIOD

Shuttlecock testing is conducted two times each year in May and November. The certification period runs for one year beginning from the certification date. BWF reserves the right to withdraw BWF certification at any time.

The certification process may take 2 months to complete. No temporary certificate requests or immediate approval requests will be entertained.

APPROVAL ENTITLEMENTS

The results of all tests are examined by the BWF and, if approval is granted, the manufacturer will be entitled to include the approval statement "Approved by the BWF for international play” on the packaging for that certified brand and grade. All certified companies and their products are listed on the BWF website.

It is NOT permitted to use the BWF logo on packaging and/or advertising.
HOW TO OBTAIN BWF EQUIPMENT CERTIFICATE

1. **Documents** - Send to the BWF the following documents:
   
   a. Application form for each brand/grade/model of shuttlecock that you wish to present for testing. The product name **MUST** correspond to the name on the product packaging.

2. **Shuttlecock Samples** - Send three (3) tubes of the feather shuttlecocks - speed 79 OR equivalent - (for each brand) to the BWF Secretariat address:

   BADMINTON WORLD FEDERATION  
   UNIT NO. 1, LEVEL 29  
   NAZA TOWER PLATINUM PARK  
   NO. 10, PERSIARAN KLCC  
   50088 KUALA LUMPUR, MALAYSIA.  
   ATTENTION: THEVAGI SUPPIAH

   Please note the shuttlecock testing periods are in May and November. **As such all sample shuttles must reach BWF Secretariat address by April and October.**

3. **Invoicing** – We will send you an invoice for the testing fee for a 12-month approval or re-approval for each new brand and/or model to be tested and, upon receipt of the payment; we will forward your shuttles for testing. When making a bank transfer, please include a reference which states your company/brand name/model followed by the wording “shuttlecock testing” and, where appropriate, the invoice number. Please email a copy of your bank transfer advice note to the BWF for the attention of Thevagi at t.suppiah@bwfbadminton.org

4. **Testing** – BWF Accredited laboratory will undertake the shuttlecock test and prepare a BWF Shuttlecock Test Report. These tests cover compliance with BWF laws of badminton, trajectory, flight deviation, tumbling stability and base surface roughness. The shuttles are tested by BWF Appointed Laboratory and international players.
5. **Issue of Certificate** – The BWF Equipment Certificate will be issued upon receipt of payment.

**HOW TO OBTAIN RENEWAL OF CERTIFICATE**

1. Prior to the expiry of the approval period please submit the Application to obtain a new approval of the shuttlecocks. Please note the shuttlecock testing periods are in May and November. All sample shuttles must reach BWF Secretariat address by April and October.

**FEES**

**New Approval** - The Approval Fee of USD 3,000 for each brand/model/grade of shuttlecock. If the shuttlecock fails the test, USD 2,000 is refundable.

**Renewals** - The Approval Fee of USD 2,000 for each brand/model/grade of shuttle. If the shuttle fails the test, USD 1,000 is refundable.

**REQUIREMENTS FOR APPROVAL**

Please refer to below regulations and charts regarding Certification Standards.

Please note that BWF will also make random tests of market samples in the following way:

- BWF will randomly over the year source samples from tournaments of some brands, such samples to be tested in BWF lab and if the shuttles fail the test, the approved will be withdrawn.
If any changes to the components, method of construction, nature or quality of the shuttle differ from the test report, and/or without BWF prior written consent it will result in approval being automatically withdrawn.

LAWS OF BADMINTON

2. SHUTTLE

2.1 The shuttle may be made from natural and/or synthetic materials. From whatever material the shuttle is made, the flight characteristics generally should be similar to those produced by a natural feathered shuttle with a cork base covered by a thin layer of leather.

2.2 The shuttle shall have 16 feathers fixed in the base.

2.3 The feathers shall be measured from the tip to the top of the base and each shuttle shall be of the same length. This length can be between 62 mm and 70 mm.

2.4 The tips of the feathers shall lie on a circle with a diameter from 58 mm to 68 mm.

2.5 The feathers shall be fastened firmly with thread or other suitable material.

2.6 The base shall be 25 mm to 28 mm in diameter and rounded on the bottom.

2.7 The shuttle shall weigh from 4.74 to 5.50 grams.

2.8 Non-Feathered Shuttle

2.8.1 The skirt, or simulation of feathers in synthetic materials, replaces natural feathers.

2.8.2 The base is described in Law 2.6.

2.8.3 Measurements and weight shall be as in Laws 2.3, 2.4 and 2.7. However, because of the difference in the specific gravity and other properties of synthetic materials in comparison with feathers, a variation of up to 10 per cent is acceptable.
3. **TESTING A SHUTTLE FOR SPEED**

3.1 To test a shuttle, use a full underhand stroke which makes contact with the shuttle over the back boundary line. The shuttle shall be hit at an upward angle and in a direction parallel to the side lines.

3.2 A shuttle of correct speed will land not less than 530mm and not more than 990mm short of the other back boundary line.
APPROVING BADMINTON SHUTTLECOCKS

Requirements apply for both shuttles sent to BWF for approval and shuttles sampled at BWF tournaments. Brands that fail test after sampling at BWF tournament will have the approval withdrawn.
